

## POLYETHYLENE CORROSIVE/ACID CABINETS

- Store strong acids such as hydrochloric, sulfuric, or nitric acid; or bases such as sodium, potassium, or calcium hydroxide in this durable, high-density polyethylene (HDPE) cabinet
- With no metal parts to corrode, this cabinet offers chemical resistance against spills or potential damaging vapors when storing acids or bases
- A removable yet sturdy sump cover, which also serves as a bottom shelf, conceals the fully integrated, leakproof sump, 8.5 gal. capacity
- Recessed channels in shelf and base help direct spills to the back of the cabinet and down into the sump
- Three application-specific labels identify contents to safely store and segregate incompatible chemicals (ACID, BASE, and CORROSIVE)
- Doors open nearly 180 degrees for easy access, engage firmly with the body when closed, and accept a padlock (not included) for added security
